

5. (Previously Amended) The composition of claim 17 wherein the solvent comprises ethanol.
6. (Previously Amended) The composition of claim 17 including a fragrance.
7. (Previously Amended) The composition of claim 17 wherein said fragrance is d-limonene.
8. (Canceled)
9. (Canceled)
10. (Canceled)
11. (Currently Amended) An antimicrobial composition containing antimicrobial complexes free of ~~halogenated compounds~~ chlorinated phenols formed by the admixture comprising: a) about 0.4 to 10% by weight phenol; b) about 0.4 to 10% by weight o-phenylphenol; c) about 0.4 to 10% by weight of a dicarboxylic acid having 2 to 4 carbon atoms; d) about 0.4 to 10% by weight of 1, 3-propanedamine, N-9-octadecenyl; and e) the remainder a solvent selected from the group consisting of a lower alkanol of 1-3 carbon atoms and water.
12. (Previously Amended) A combination of the composition of claim 11 and a polymer capable of forming a fiber or a film.
13. (Original) The combination of claim 12 wherein said polymer is an acrylic polymer.
14. (Currently Amended) The combination of claim 12 polymer is a cellulosic polymer.
15. (Canceled)

16. (Previously Amended) The combination of claim 11 wherein said polymer is an acrylic polymer.

17. (Currently Amended) A film forming antimicrobial composition free of ~~halogenated compounds~~ chlorinated phenols formed by admixing: a) about 0.4 to 10% by weight of phenol; b) about 0.4 to 10% by weight of o-phenylphenol; c) about 0.4 to 10% by weight of a polycarboxylic acid having 2 to 4 carbon atoms; d) about 0.4 to 10% by weight of 1, 3-propanediamine, N-9-octadecenyl; and 3) a solvent selected from the group consisting of water and an alkanol of ~~2-4~~ 1-3 carbon atoms as the remainder.
